-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

*Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7,9,18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Powers et al (6360120).

Powers shows memory in the adaptor of a cable that connects to a defibrillator.

The patient monitoring station is only inferentially claimed in claim 7.

*Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6,8,10-17,21-26,31-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Powers et al.

Powers shows a defibrillator that has a patient monitor 24 inside. This monitor can monitor such signals as the ECG. A patient monitoring station, as set forth in the claims, is considered to be obvious over the defibrillator apparatus of Powers since the same function and results are obtained; the monitoring of the patient's condition. The electrodes of Powers are considered to be sensors since they

Art Unit: 3762

sense the patient's ECG. Also, it is obvious to use a sensor adaptor since they are common in the art, and allow for different types of sensors, such as differently sized electrodes, to be put on the cable. This ability allows for a greater range of treatment. Accordingly, to put the memory in the sensor adaptor, instead of the station adaptor, is considered to be well within the skill of the ordinary artisan.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Morgan et al (6134468) shows the use of various types of adaptors, including sensor adaptors.

*Allowable Subject Matter*

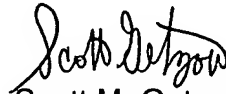

6. Claims 27-30 are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott M. Getzow whose telephone number is (571) 272-4946. The examiner can normally be reached on M-F, 9-5.
